

Speaker, Author, Advocate, Leadership Futurist, Tech Exec

VISION

Looking at my former workplaces in tech, I could not help but ask, "Where are all the women?" So, I pursued a doctorate and studied common characteristics of trailblazers. These incredible women opened my eyes to the concepts of unconscious bias and positive disruption.

This path has ultimately led me to pursue a career at the intersection of technology, humanity, and business. My life's work is to disengage people from the status quo and lead them to adopt real change and disrupt the world.
